

20 Stem Matchbooks

Helpful Hints

- The distributor ID line on the template is required by Federal law. It is so small, most people don't see it. It is on the small fold at the bottom of the matchbooks.
- Please build your design on top of the template on the Art layer. Keep the template locked.
- Any design with a colored background (other than plain white), must measure to the pink "bleed line" shown on the template.
- All important info (logo or text) must be within the dashed line areas (Live Area).
- Inside print is available for an additional charge per case.
